# Jake Recharte

(805) 889-0380 | jakerecharte@gmail.com | linkedin.com/in/jake-recharte-8a3470377 | github.com/JakeRecharte

## EDUCATION

**San Diego State University** | *College of Sciences* | San Diego, CA
*Bachelor of Science in Computer Science* | *Expected May 2028*

**Relevant Coursework:** Data Structures, Introduction to AI, Advanced Programming Languages.

**In-Progress:** Algorithms, Machine Learning, UNIX/System Design, 3D Game Design, Ethics of AI

## WORK EXPERIENCE

**GradeFlow** | *Software Developer Intern* | February 2026 – July 2026

- Built a curriculum standards tagging feature in a team of 5 that accepts teacher-uploaded assignment descriptions and automatically assigns aligned curriculum standards with confidence scores.
- Used PDF scrapers to extract and store structured curriculum standards data from 1,000+ curriculum pages into a searchable knowledge base hosted on Supabase.
- Developed and integrated a machine learning algorithm to map assignment descriptions to standards with scored confidence outputs, showing an average of 82% accuracy.

**NAVSEA / FathomWorks** | *Engineering Program Student* | September 2023 – December 2023

- Worked in an 8-week government-sponsored defense engineering program in partnership with FathomWorks, covering a broad range of defense and military technologies; attended technical lectures from active government and defense industry professionals.

**Recharte's Gold Coast Insurance** | *IT & Office Support* | September 2021 – May 2023

- Provided in-house IT support including hardware upgrades for the office's 7 computers, Windows OS installations, and software configuration for office systems.

## PROJECTS

**Building for Good Hackathon - Permit Paragons** | *Typescript, Python, Docker* | August 2026

- Placed 4th in a team of 6 with over 100 participants building a permit prediction algorithm to speed up low income housing developers timelines.
- Responsible for front end creation of map outlining over 330,000 individual parcels in San Diego County.

**CWG Language Interpreter** | *Python, GitPython, Git* | May 2026 – Present

- Designed an experimental programming language where the git commit DAG is the source code: branches define control flow blocks, commits are Python statements, merges close scopes, tags define functions, and git revert doubles as an exception handler.
- Built a tree-walking interpreter that scrapes the repo via GitPython, constructs an AST of if/while/for/fn nodes, and executes statements via Python's exec/eval.

**AI Trading Model** | *Python, Pandas, NumPy, yfinance, scikit-learn* | November 2025

- Created stock prediction pipeline using the Yahoo Finance API to collect and preprocess historical market data for model training.
- Trained a Random Forest Regression model to predict top-performing stocks and construct an equal-weight portfolio of the top 5 predicted picks, beating the stock market by 1.7% in backtesting.

**Avalanche NFT Project** | *Avalanche Blockchain, Web3* | 2022 – 2023

- Co-founded and led a team of 8 to design, develop, and launch an NFT collection on the Avalanche blockchain, overseeing smart contract deployment and community growth generating $12,000 in mint revenue.

## SKILLS

- **Languages:** Python, C++, JavaScript, TypeScript, Java, SQL, Dart
- **Frameworks & Libraries:** React, React Native, Flutter, Pandas, NumPy, scikit-learn
- **Databases:** Supabase (PostgreSQL)
- **Tools & Platforms:** Git, GitHub, Linux/Unix, Docker, Expo, Hugging Face, Claude API
- **Concepts:** Machine Learning, Blockchain, PDF Parsing, Data Structures & Algorithms, AI Vision, REST APIs

## EXTRACURRICULAR ACTIVITIES

**Sigma Phi Delta** | *Engineering Fraternity, Academic Chair* | November 2025 – Present

- Planned and oversaw bi-weekly study sessions across a 4 month period with over 40 brothers attending regularly.

**AI Club** | *Member* | January 2026 – Present

- Completed one semester long group project as a member of the club so far and currently working on a second
